

DPS 423 Electronic Component Test Station

Description:

Simplify your repair and qualification processes. The **DPS 423 Electronic Component Test Station** enables the ability to quickly test and diagnose the following components of the **DPS 2020-He ETD**:

- ETD Main PCBs
- Radio
- GPS
- HVM
- Secondary Display

Features:

- Quick connections via in circuit test probes (no cables)
- Simulates turbine RPM, pressure and voltage (no air needed)!
- Test power and charging with a single switch
- Small form factor for portability and ease of use.
- Used in conjunction with a **DPS 8100 Dual Linker** or **DPS 3030 Head of Train** Device enables testing of the functionality of the ETD components
- USB and serial communication to DPS proprietary Test and Calibration software
